- Designed the Home Delivery operational framework from scratch — the model proved so effective it was standardized and rolled out across PAN India operations.
- Scaled NCR delivery operations to 1,000+ monthly deliveries by December 2022, growing home delivery volume from 50 to 300 units per month — a 6x increase.

- Later transitioned into a UK-based digital marketing and lead generation project, expanding scope beyond the original brief.
- Voluntarily worked 7 days a week against a 5-day contract to maximize output during an uncertain period.

- Conceptualized and operationalized the city's walking tours, food tours, and night tours from scratch — building itineraries, getting them approved, and running full city operations.
